THE ASTRO HIRE GUARANTEE

Project Fulfilment Made Easy

How?

- ✓ Our Team ensures peace of mind with every interaction
- ✓ We keep great availability of machines and attachments to save you time looking for equipment
- ✓ We arrange logistics for deliveries and pick-ups to save you the hassle of finding transport
- ✓ Our qualified field technicians deliver, fit and commission attachments so you know they will work from the get-go

THE FOUR PILLARS OF DEDICATION TO THE INDUSTRY

QUALITY TIER 1 SPEC

Astro's fleet are all Tier 1 Site Spec to ensure compliance with site requirements and ease of onboarding onto your site and are fitted with some of the latest technology. Our average fleet age is under 2 years and less than 2000 hours old, sourced from leading brands to ensure maximum uptime and performance.

SPEED OF RESPONSE

Our Team understand that time is money and when you have other trades and machines pushing you, you can't wait for an answer! We are wired to respond with urgency and speed and will go above and beyond to keep your project moving.

COMPLETE ONBOARDING

We understand how important it is to get paperwork right. We pride ourselves on having all our paperwork in order and up to date to ensure your machines are inducted onto site painlessly.

EARTHMOVING EXPERTS

We have one of the most comprehensive ranges of equipment and attachments in SEQ. Backed by our in-house mechanics, GPS & Attachment Specialists, our team know how to make any civil earthmoving project more efficient and productive.

ROAD & RAIL

Road & Rail projects are one of the key drivers of our nation's economic activity and our team loves helping civil contractors working in this space deliver their contracts on time and on budget.

Whether that's through providing a specialised attachment, on-surface or off-surface equipment or additional equipment with 3D machine control Astro Hire is well-placed to assist on any road or rail project within the Southeast QLD corner and beyond.

CIVIL CONSTRUCTION

Who doesn't love the challenge of a tight construction site with a good basement dig?

The Astro Hire Team does! We regularly supply short radius excavators and specialised attachments to construction sites to ensure basement dig, service laying and foundation work goes to plan for our clients.

ENERGY, SOLAR FARMS & TRANSMISSION LINES

Renewable Energy is proving to be a key mix in Australia's future power supply.

Astro Hire has been involved in the delivery of many renewable energy projects and is well placed to help contractors in this space deliver these projects.

We have an excellent range of attachments to suit both excavators and posi tracks and these are often utilised on these projects, whether it be slashers, grader blades, deep trench buckets, augers and rock augers.

PILING & FOUNDATION CONTRACTORS

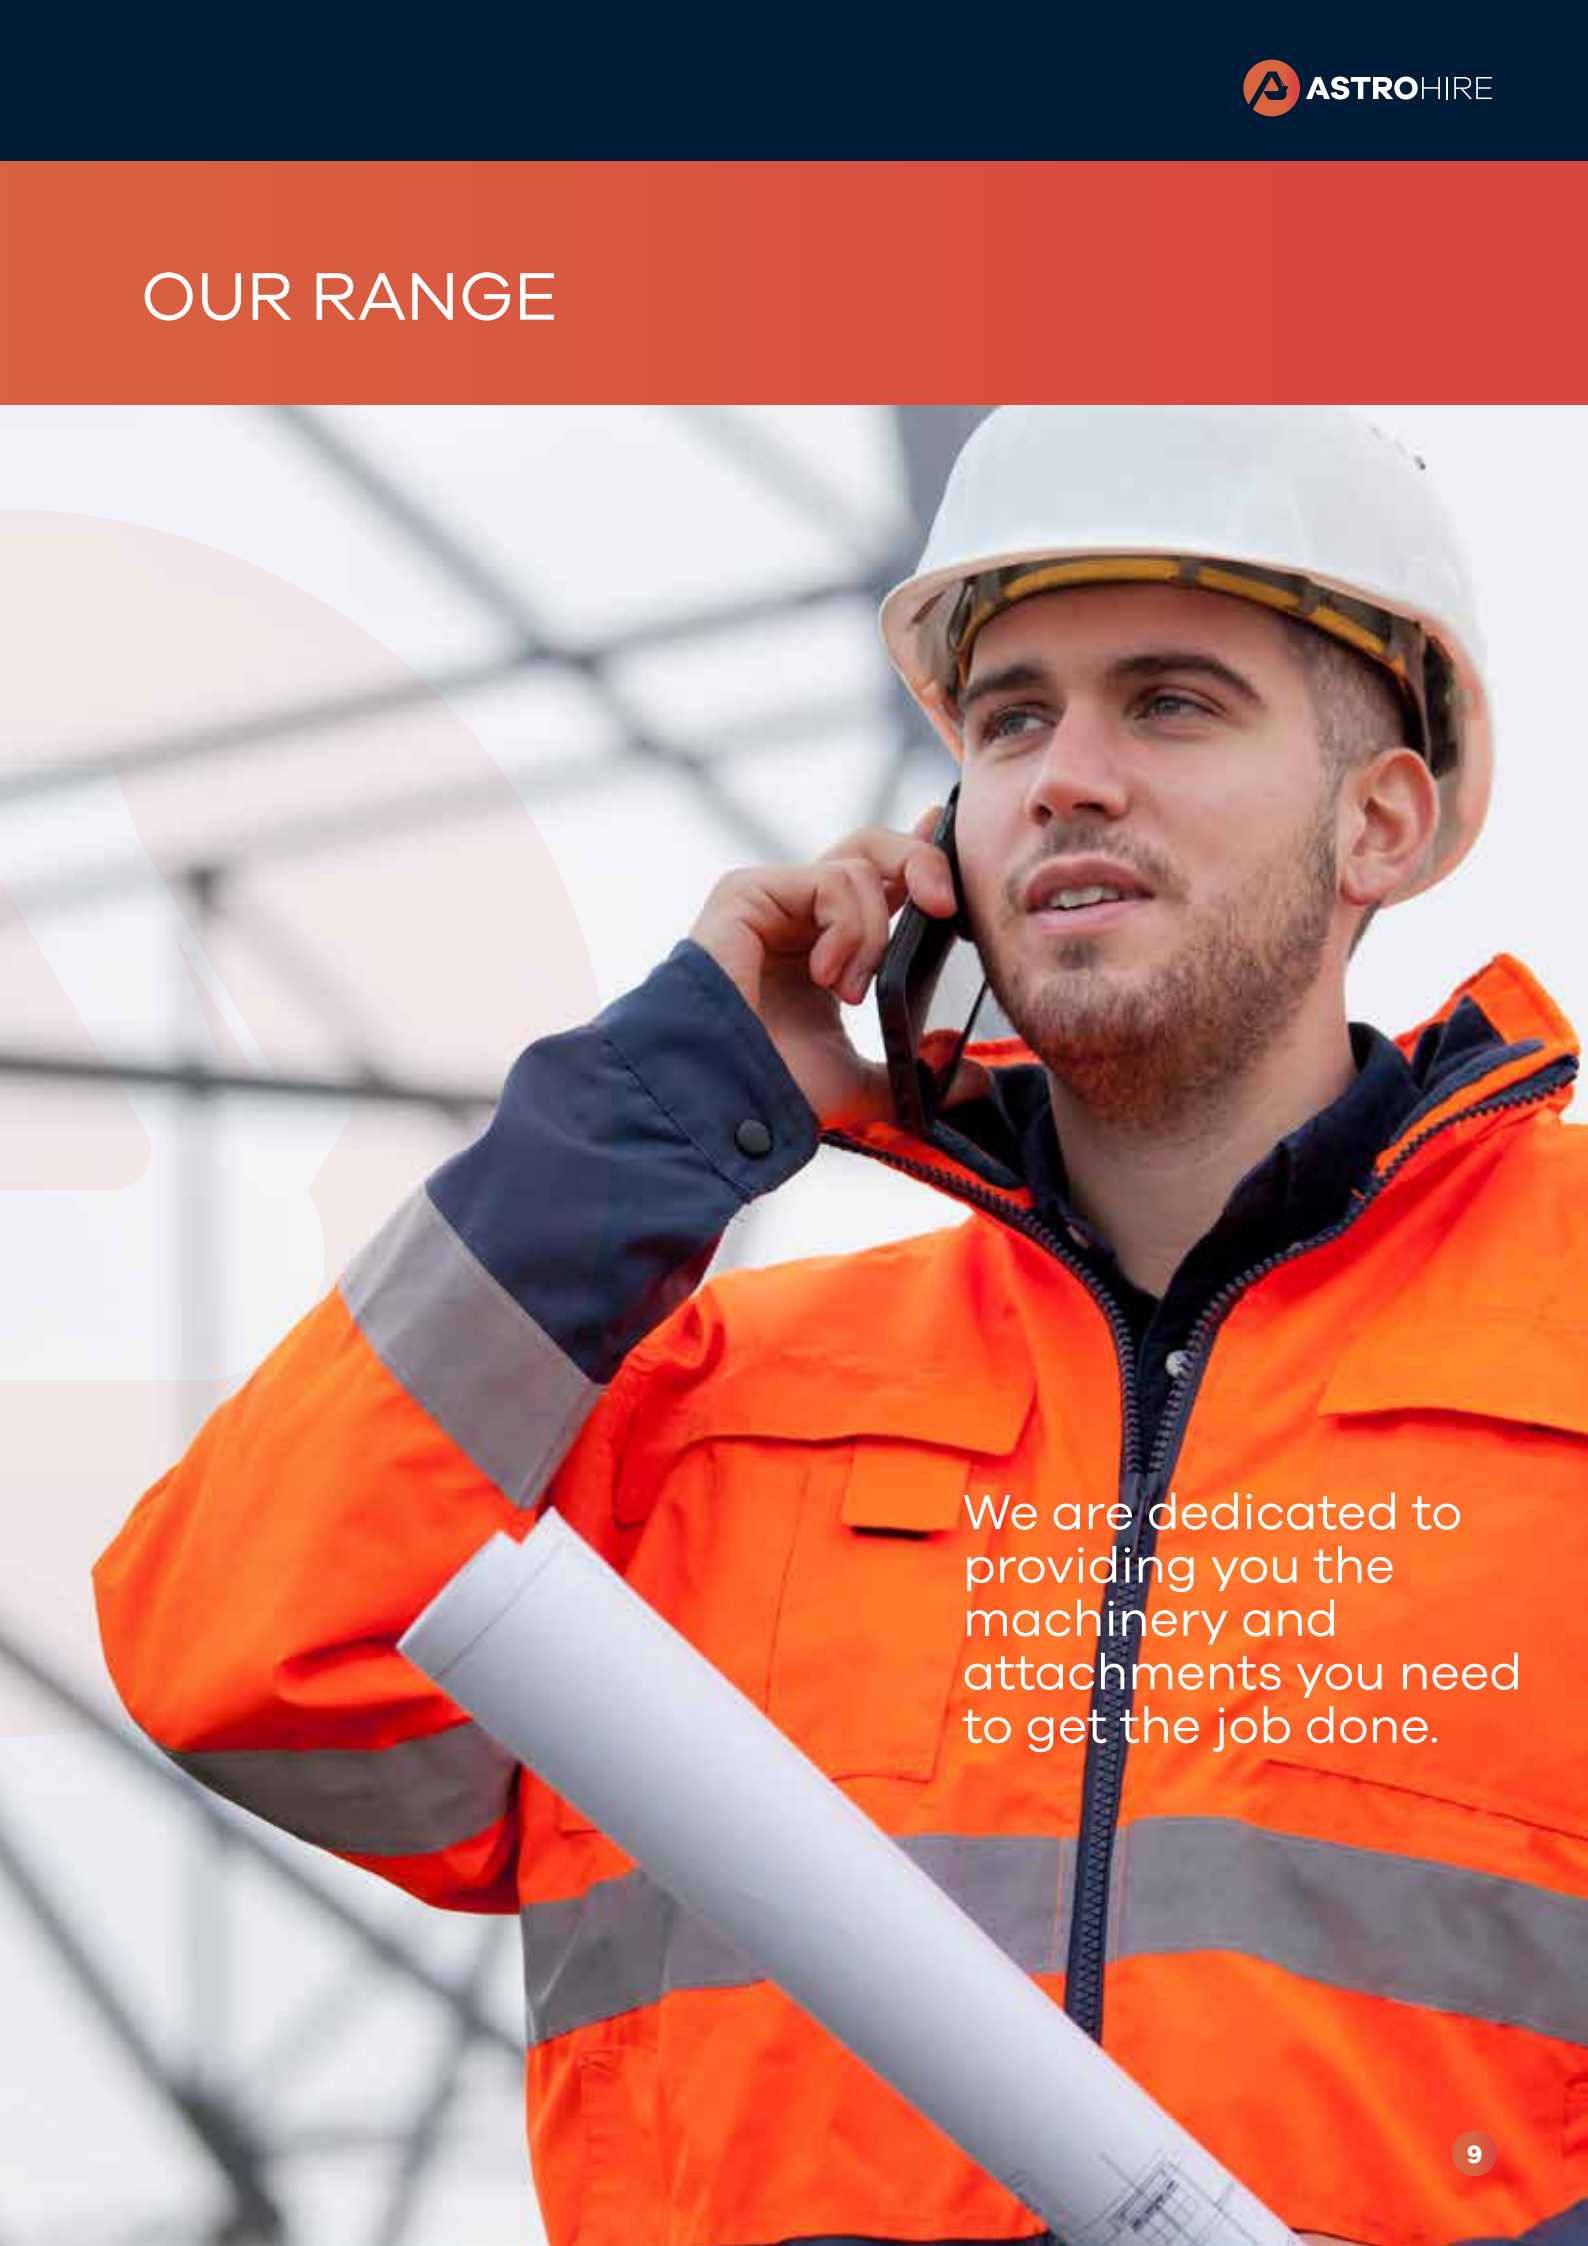

Astro Hire has an extensive range of augers, rock augers and core barrels for the piling and foundation industry.

Yes, we carry all the standard sizes, but also some of the not so common sizes – like a 3m auger to suit a 50t excavator or large drill rig for example! We also carry goose necks, vibe plates and timber pile drivers.

Our excavators are all kitted with case drains for running larger auger motors and these specialised attachments.

Give our Team a call today to see how we can help deliver your piling & foundation projects!

OUR RANGE

We are dedicated to providing you the machinery and attachments you need to get the job done.

EXCAVATOR ATTACHMENT HIRE

Try our 'deliver, fit and commission' service next time you need an attachment.

This ensures the attachment fits your machine, your machine is configured to the right flow rates and pressure from the get go for trouble free operation.

Forget the painful delays of having the wrong hitch size or hoses that are too short and let the Astro Team 'deliver, fit and commission'!

SPECIALIST EXCAVATOR OPTIONS

Astro Hire is on a mission to be the market leader in SEQ for the hire of specialty earthmoving equipment.

This includes, but is not limited to, 3D machine control, offset boom excavators, tilt rotators, and height and slew restrictors. We are experts in the field of earthmoving, so call our team today to talk about how we can help make your civil site more efficient.

- Cut grade fast and accurately the first time
- Improves job safety
- Brands including Unicontrol & Trimble
- In-house technical support available

GPS CONTROL 14-35t

- Improve jobsite safety and prevent damage to critical infrastructure with height & slew restriction
- Easy to set restricted access areas
- Tier 1 approved

HEIGHT & SLEW 3.5-35t

- 17 & 22t units available
- Great for on surface applications or where frequent travel is required between sites

WHEELED EXCAVATORS

- Enjoy the benefits of greater productivity
- Great for rail and road projects
- Available on a range of excavators

TILT ROTATORS

- Great for trenching against buildings or roadways
- Available with and without rubber pads

OFFSET BOOM 14t

- Improves the lifting capacity of equipment allowing full uses of the machines capacity at any range
- Keep your tippers compliant with road regulations by knowing the weight of the material you are loading
